

Study Visit by the Polish delegation

The friendly team from Poland consisted of:

Stanislaw Malachowski - owner of the big seed company in Koscierzyna north Poland close to Gdansk
Boguslaw Golebiowski and Roman Kobylinski - of the company "JW Agro" Ltd from Nowogard close to Szczecin.

Andrzej Klasa - University of Warmia and Mazury in Olsztyn, research worker and academic teacher.

The polish delegation.

Gert Tarstad, Ebbe Nordell, David Andersson and Bengt-Erik Löfgren.

Sven-Olof is welcoming everyone.

Gert Tarstad – founder of HOTAB is explaining the complexity of agro-biomass combustion.

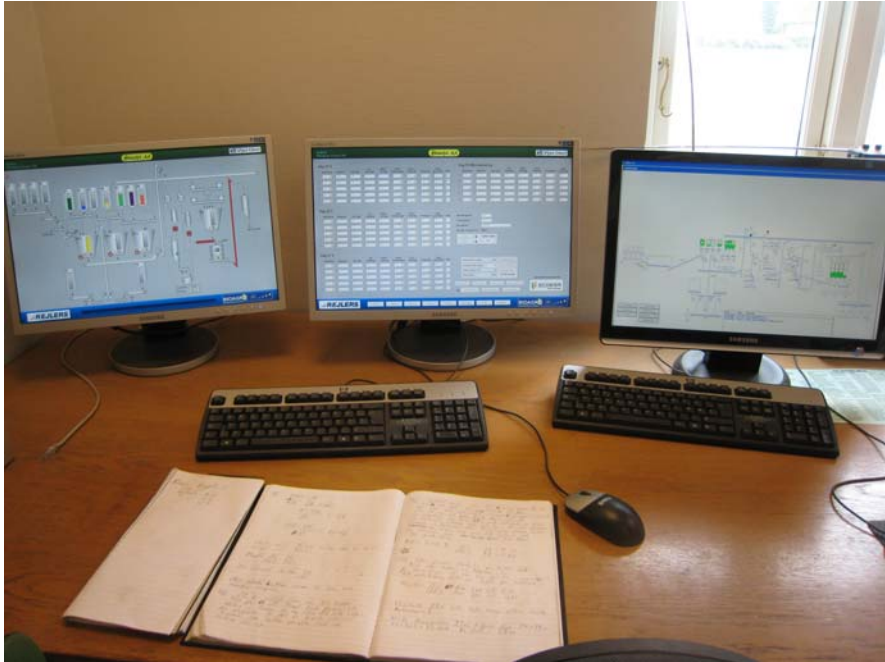

David of Ecoera.

Bengt-Erik Löfgren is showing the numbers behind climate change

The whole group outside the BIOAGRO facility.

Complete flow control and facility automation control center.

Pelletizer and Furnace control center.

BIOAGRO Command central – Bernhoff showing the control room

Gert Tarstad showing the 250 kW BioBoiler from HOTAB.

Demonstration of the pellet flow within the facility.

The maintenance platform.

Sven-Olof Bernhoff showcasing the hammer mill. Fingers crossed, not crushed.

Top view from the demonstration ramp in the BIOAGRO facility.

Here, Sven-Olof Bernhoff is showing the small-scale system and how the die diameter is linked to pellet quality.
