

SIDA 2008-09-23

Thank you very much for hosting us today. We had a very nice time and we learned a lot. I appreciate how open you were and your willingness to share your knowledge with us.

We had a very nice mix of topics that were covered today, from an insight on how seed-production companies are run to equipment for seed

processing plants and waste re-utilization. Talks were really nice, very well prepared and very clear. Thanks very much. I hope I see some of your companies in Costa Rica at some point in the near future.

Adriana Murillo Williams

SIDA 2008-09-23

Thank Skånefrö AB for the excellent presentations.
I hope we will have an opportunity to come back
again someday in the future!

BIOAGRO
Renewable Source of energy

Impressive! Doing well in a very
competitive market.

Thanks for the hospitality!

BIOAGRO

Renewable Source of energy

It is a good company that was interesting for me. I have a lot of information about seed industry. Link between the company with farmer (seed grower) and breeder and soon. Also I got information about many kind of machinery for seed production may be some of them are needed for supporting the seed industry in my country.

Good presentation

But less information about Bioagro

A visit to Skånefrö 23/09/2008

By: William Kirwa

PO ADC, Dev. Hse. Moi Avenue

Box 47101-00100 NAIROBI, Kenya

The team,

This was an excellent explanation and a clear demonstration of how institutions can be built.

Skånefrö has shown the way in efficient seed production and even how to utilize waste for energy production (biofuels). Thank you so much.

Keep up the good work.

Best wishes.

William

SIDA 2008-09-23

It was a very interesting experience with high mechanisation in place for seed processing. Amazing energy generating waste technology. I learnt a lot of things out here

Thanks to everybody in these mentioned companies

The creation is soon equal to the innovation.

All successes from Research should be rapidly helpful for human and new generation.

From Pak Won Guk
Korean Breeder, DPR Korea
Sep. 23, 2008

I really impressed about the agro-waste are made to usefull product so called "Pallet" for alternative source for energy. That idea is very important to specially developing countries to solve their problem due to fuel crisis.

SIDA 2008-09-23

THANKS FOR THINK IN THE FUTURE OF THIS
PLANET. SPREAD THE NEW TECHNOLOGIES IN
ALL THE DEVELOPMENT COUNTRIES
THIS NEW TECHNOLOGY WILL BE VERY USEFUL
AND WE HAVE A LOT RAW MATERIAL IN
OUR COUNTRIES
PLEASE TEACH TO OTHER PEOPLE THE
IMPORTANCE TO STOP CONTAMINATION.

THANK A LOT FOR SHARE WE ALL OF US
YOUR KNOWLEDGES AND WE APPRECIATE
ALL YOUR ATTENTION.

IT WILL BE INTERESTING TO BUILD MACHINES
FOR SMALL SCALES TO MAKE PELLETS
AND THINK IN OTHER PRODUCTS MADE WITH
WASTE MATERIALS LIKE CHIPS ORBS OR
CONSTRUCTION MATERIAL

THANKS FOR
ALL.

SIDA 2028 -09-23

It is very good chance for us
I hope you'll have a better
future.

Li Jong Su.

BIOAGRO

Renewable Source of energy

The presentation are very good, many information we have got and it is very important. Especially presentation about Bioagro, its usefull for us.

Presentation from Skanefro and Scandinavian seed is very good. ~~It~~ We learn more about seed industry in Sweden.

People / persons in this company are very nice & kindness, thank you

Presentation of about Westrup need to be more Life
Thank you & ~~best~~ God bless you all.

SIDA 2008-09-23

It's very interesting day we have passed
with you in your company?
Pure information
New technology
Good ideas
Good presentation.

Visit but it's very important for
us and for me it's a complete
useful day in fruitful information

Thank you very much for your
hospitality and I see in one place
maybe in future

Very interesting presentations.
Thanks for your invitations.
~~It was a very interesting presentation.~~
I think we obtain good impression,
information and knowledge.

There is a lot to learn from this company for particularly Broadgro technology despite of time constraints but we are leaving with something on our hands.

Thanks for interested lectures and ~~at~~ tours we received around the factory. You showed how you dedicated of staff you have.

Suggestion:

There is a need for your company to open the door in some of African countries which are not in yet reached, especially on portlet technology. Resources are there.

Your company is very interesting for company which concern about global warming. And you can use

it for market too.

This is a good example.

The presentation is clear and useful.

The lecture was very educative, wide exposure especially that I am coming from a steel company.

These processing machines are well partitioned which makes easy movements and low accidents.

Keep it up.

- The whole idea is good, it's environment friendly.
- I liked the collaboration effort with other organizations. It makes it easier to bring in new ideas.
- In-built research in this project makes it very efficient in term of inputs as well as human resource.

The presentation was very interesting and important. I learn many useful experiences. I wish you could meet and thank you.

The machine is very nice,

Warm reception - kindness & taking care.

interesting / presentations, new knowledge on Biogas
exciting

A loud speaker needed

Not very convenient for late.

THANKS A LOT.

Every thing are very good
The seeds are more clean

which I had seen it today are
very completely than my Previous -
Participations, it look very good fact
which hope to traws to whole the world.

my appricatied and my best greetings
for each one here!
Mohamed Hassona
Seed Production, Sekem, Egypt

81

- It's very interesting
- Large scale production globally
- Produce in present and think v. about future.

SIDA 2008-09-23

Like the participants of International training programme on "plant breeding and seed production" held at Svalof from September 1-26, 2008. We visited this company on 23-09-2008 and we were informed much on seed processing and seed production aspects.

We got more information about Bio-Agro company and its objectives. We are really happy and satisfied about the information. The visit was more worth and much informative. We wish to visit again and get still more information about the recent techniques in seed production and seed processing.

I wish to have contact with this company i.e Skånefrö AB. We place on record that they showed very kind hospitality and gesture.
With kind regards.
Thanking you.
Yours participant.
