Very interesting & compact processing plant would like to
know more about the details of the material flow.
Thank you Christian Papp for the contact!

FRANK O'DONOVAN, CNM, CORR NA MÓNA, Co. Galway.

The choice of your PELLETING machine (Anders-Spout) was interesting. It's often interesting to compare the performance post purchase with promises made when a machine is purchased.

The factory had a source of very dry raw material

by Irish Standards. It would be very difficult to source raw material @ 11-20% moisture content in Ireland. I wonder how the system would work in Ireland with a wetter raw material. Any suggestions as a suitable dryer?

The factory is nice and compact and does not take up too much space.

Is this plant/factory economical? Is it giving a 'return on investment'? The number of days you will run seems low for the investment made.

Best of luck with the new Enterprise. I hope you are up and running @ full speed very soon.

Skånefrö AB
